The multiverse is a hypothetical group of multiple universes including the universe in which we live. Together, these universes comprise everything that exists: the entirety of space, time, matter, energy, and the physical laws and constants that describe them. The different universes within the multiverse are called "parallel universes", "other universes", or "alternative universes".

Flash memory is an electronic (solid-state) non-volatile computer storage medium that can be electrically erased and reprogrammed.. Toshiba developed flash memory from EEPROM (electrically erasable programmable read-only memory) in the early 1980s and introduced it to the market in 1984. [citation needed] The two main types of flash memory are named after the NAND and NOR logic gates.
