This chapter discusses the fundamentals of phase behavior of hydrocarbon fluids. The influence of water on the phase behavior and properties of hydrocarbon fluids in most cases is of minor consideration.

Il primo principio della termodinamica, anche detto, per estensione, legge di conservazione dell'energia, Δ un assunto fondamentale della teoria della termodinamica.. Il primo principio della termodinamica rappresenta una formulazione del principio di conservazione dell'energia e afferma che: Δ «L'energia interna di un sistema termodinamico isolato Δ costante. Δ »

Primo principio della termodinamica - Wikipedia

In termodinamica, il calore latente Δ la quantit Δ di energia scambiata (sotto forma di calore) durante lo svolgimento di una transizione di fase (o "passaggio di stato"). Ad esempio, il "calore latente di fusione" Δ

l'energia massima corrispondente al passaggio di un sistema (costituito da una a pi¹ sostanze chimiche) dallo stato solido a quello liquido.

Calore latente - Wikipedia

Heating, ventilation, and air conditioning (HVAC) is the technology of indoor and vehicular environmental comfort. Its goal is to provide thermal comfort and acceptable indoor air quality. HVAC system design is a subdiscipline of mechanical engineering, based on the principles of thermodynamics, fluid mechanics and heat transfer. "Refrigeration" is sometimes added to the field's abbreviation, as ...

Underfloor heating and cooling is a form of central heating and cooling which achieves indoor climate control for thermal comfort using conduction, radiation and convection. The terms radiant heating and radiant cooling are commonly used to describe this approach because radiation is responsible for a significant portion of the resulting thermal comfort but this usage is technically correct ...

Python is a basic calculator out of the box. Here we consider the most basic mathematical operations: addition, subtraction, multiplication, division and exponentiation. we use the `func:print` to get the output.
