Dome City Blues is a great fast pace mystery that kept me reading late into the night. If I had more reading time I would have read it straight through. What is really interesting was the author wrote it 22 years ago but never had released it.

A domed city is a hypothetical structure that encloses a large urban area under a single roof. In most descriptions, the dome is airtight and pressurized, creating a habitat that can be controlled for air temperature, composition and quality, typically due to an external atmosphere that is inimical to habitation for one or more reasons. Domed cities have been a fixture of science fiction and futurology since the early 20th century, and may be situated on Earth, a moon or other planet.
