Dynamic Pricing, Attention, and Automation: Evidence from a Field Experiment in Electricity Consumption  
James M. Gillan — November 14, 2017 Abstract Dynamic pricing models typically assume that consumers respond to marginal incentives. But how attentive are consumers to these incentives? I use a field experiment to assess the

to YM, dynamic pricing, and allocation tasks is discussed. Two models of the use of RL in the dynamic pricing and automated resource allocation context are then presented. The first model addresses the yield maximizing scheduling of ISIP tasks on a single resource, whereas the second model enables the yield
