Microwave frequency electromagnetic fields (EMFs) produce

The best understood biological effect of electromagnetic fields is to cause dielectric heating. For example, touching or standing around an antenna while a high-power transmitter is in operation can cause severe burns. These are exactly the kind of burns that would be caused inside a microwave oven. [citation needed] This heating effect varies with the power and the frequency of the ...

5G networks in European Countries: appeal for a standstill

Electromagnetic fields (EMFs) have been around since the beginning of time as we receive natural EMFs from the sun and earth itself. It wasn't until mankind learned to generate electricity (and EMFs) that we hit technological breakthroughs like lightbulbs and radio communications.
